Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Phase 1 – Brainstorming & Ideation

Project Title

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

1. Problem Identification

- The existing IT procurement process for standard laptop orders involves manual work and lacks sufficient automation.
- The configuration step can be prone to delays and oversight. This can result in delay in laptop configuration, increased manual effort, user waiting time, inefficient resource allocation, and possible errors.

2. Existing Process

The IT procurement team handles laptop configuration-related tasks manually. After a standard laptop is requested, the configuration task needs to be identified and assigned to the appropriate team.

3. Proposed Solution

- The proposed solution is to use ServiceNow Flow Designer to automate the standard laptop procurement workflow.
- When a standard laptop request receives approval, the workflow creates a Catalog Task and assigns it to the Hardware group for configuration.

4. User Story

As an IT procurement team member, I want the standard laptop ordering process to be streamlined so that configuration tasks are automatically generated and assigned to the Hardware team, reducing user waiting time and manual intervention.

5. Project Objectives

- Automate the standard laptop procurement workflow.
- Automatically create configuration tasks after approval.
- Assign configuration tasks to the Hardware team.
- Reduce manual intervention and errors.
- Improve task allocation, resource utilization, efficiency, and productivity.

6. Key Benefits

- Reduces repetitive manual activities.
- Helps configuration tasks reach the responsible team quickly.
- Minimizes mistakes caused by manual task creation and assignment.
- Automatically assigns the task to the Hardware group.
- Helps reduce user waiting time.
- Improves productivity.

7. Initial Project Idea

Laptop Request → Approval → Automatic Catalog Task Creation → Hardware Team Assignment → Laptop Configuration
