Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Phase 3 – Project Design

1. System Design

The project is designed around a ServiceNow Service Catalog request connected to a Flow Designer workflow.

2. Workflow Design

Laptop Request → Service Catalog → Approval → Flow Designer → Create Catalog Task → Assignment Group: Hardware → Configuration

3. Flow Components

- Trigger: Service Catalog
- Action: Create Catalog Task
- Request Item: Requested Item Record
- Short Description: Laptop need to Configured
- Description: Laptop need to Configured
- Assignment Group: Hardware
- Approval: Approved

4. Service Catalog Design

The Standard Laptop item is available under Service Catalog → Hardware. The user selects Standard Laptop and chooses Order Now.

5. Output Design

The final output is a Catalog Task associated with the Requested Item. The task contains the configured short description and is assigned to the Hardware group.
