Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Phase 4 – Project Planning

1. Project Plan

The implementation is planned through three main milestones followed by testing, documentation, and demonstration.

2. Milestone 1 – Flow Creation

- Create a Flow named Standard laptop task.
- Set Application as Global and Run user as System user.
- Add Service Catalog trigger.
- Add Create Catalog Task action.
- Configure Requested Item Record, short description, description, Hardware assignment group, and Approved condition.
- Save and Activate the Flow.

3. Milestone 2 – Flow Assignment

- Open Maintain Items and locate Standard Laptop.
- Open the Standard Laptop record.
- Under Process Engine, remove remaining automations and add the Standard Laptop Task Flow.
- Save the configuration.

4. Milestone 3 – Service Catalog Execution

- Open Service Catalog → Hardware → Standard Laptop.
- Select Order Now.
- Open the order status and Requested record.
- Approve the request.
- Open the Requested Item and check Catalog Tasks.
- Verify the generated task, short description, and Hardware assignment.

5. Deliverables

- Configured ServiceNow Flow
- Configured Standard Laptop catalog item
- Working Catalog Task workflow
- Testing evidence and screenshots
- Project documentation
- Demo video
