Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Phase 5 – Project Development

1. Development Environment

The project is implemented using ServiceNow and its Flow Designer and Service Catalog features.

2. Create the Flow

- Open ServiceNow → All → Flow Designer → New → Flow.
- Enter Flow Name: Standard laptop task.
- Set Application: Global.
- Set Run user: System user.
- Submit the Flow.

3. Configure the Trigger

- Add a trigger.
- Search for and select Service Catalog.
- Select Done.

4. Configure the Action

- Add an action.
- Search for and select Create Catalog Task.
- Drag and drop Requested Item Record into Request item.
- The table is automatically populated as Catalog Task.

5. Configure Task Details

- Short description: Laptop need to Configured
- Description: Laptop need to Configured
- Assignment group: Hardware
- Approval: Approved

6. Save and Activate

- Complete the remaining default fields.
- Select Done.
- Save the Flow.
- Activate the Flow.

7. Assign the Flow to Standard Laptop

- Open All → Maintain Items.
- Search for Standard Laptop and open the record.
- Open Process Engine.
- Remove the remaining automations and add the Flow.
- Select Standard Laptop Task and save.
