Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Phase 6 – Project Testing

1. Testing Objective

The purpose of testing is to verify that an approved Standard Laptop request automatically creates the required Catalog Task and assigns it to the Hardware group.

2. Test Case 1 – Standard Laptop Order

- Action: Open Service Catalog → Hardware → Standard Laptop → Order Now.
- Expected Result: A Standard Laptop request is created.

3. Test Case 2 – Approval

- Action: Open the request, go to the Approvers section, and approve the request.
- Expected Result: The request is approved and the configured Flow can proceed.

4. Test Case 3 – Catalog Task Creation

- Action: Open the Requested Item and check Catalog Tasks.
- Expected Result: A Catalog Task is created automatically.

5. Test Case 4 – Task Details

- Action: Open the generated Catalog Task.
- Expected Result: Short Description shows 'Laptop need to Configured' and Assignment Group shows Hardware.

6. Test Result

The workflow is verified by checking the Requested Item and Catalog Task after approval. The expected output is the automatically generated task with the configured details and Hardware assignment.
