Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Phase 7 – Project Documentation

1. Project Overview

- Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
- The project automates the configuration task creation and assignment process for standard laptop procurement using ServiceNow Flow Designer.

2. Problem Statement

The existing process involves manual work and can cause delays and oversight during laptop configuration.

3. Objective

The objective is to automate procurement/configuration activities, reduce manual intervention and errors, improve task allocation and resource utilization, and improve efficiency.

4. Implementation Summary

The project includes Flow creation, Flow assignment to the Standard Laptop item, and execution through the Service Catalog.

5. Final Workflow

Standard Laptop Order → Approval → Automatic Catalog Task → Hardware Assignment → Configuration

6. Documentation Evidence

- Flow Designer configuration screenshots
- Standard Laptop configuration screenshot
- Service Catalog order screenshot
- Approval screenshot
- Requested Item screenshot
- Catalog Task screenshot showing Short Description and Hardware assignment

7. Project Deliverables

- Working ServiceNow workflow
- Testing evidence
- Phase-wise documentation
- Demo video
