Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Phase 8 – Project Demonstration

1. Demonstration Objective

The demonstration explains the project purpose, shows the ServiceNow workflow execution, and presents the final Catalog Task output.

2. Demo Sequence

- Introduce the project title.
- Explain the problem with the existing manual process.
- Explain the proposed Flow Designer solution.
- Open ServiceNow.
- Navigate to Service Catalog → Hardware → Standard Laptop.
- Select Order Now.
- Open the request and show the Approvers section.
- Approve the request.
- Open the Requested Item.
- Scroll to Catalog Tasks.
- Open the generated Catalog Task.
- Show Short Description: Laptop need to Configured.
- Show Assignment Group: Hardware.
- Explain that the configuration task has been automatically created and assigned.

3. Final Output

The final demonstration should show the automatically generated Catalog Task after approval, with the configured short description and Hardware assignment.

4. Demo Video Requirements

- Record the complete project execution.
- Use screen sharing/recording with voice-over.
- Explain the project name, purpose, benefits, working process, and final output.
- Upload the completed demo video to Google Drive.
- Set the sharing permission to Anyone with the link can view.
- Add the demo link to the project documentation/GitHub Phase 8 folder.
